

FIRE

Making and practicing a fire escape plan can save lives when a fire breaks out. Most people die from smoke, not flames or heat. This four part plan could save your life!

- 1. Install smoke detectors;** keep them in good working order.
- 2. Plan your escape route** on a floor plan; decide on an outside meeting place.
- 3. Discuss this with your family;** decide who will take charge of a child if a fire occurs.
- 4. Practice your exit plan,** especially at night.

A full-page sheet of white graph paper with a uniform grid of thin black lines. The grid consists of small squares covering the entire area. There are no margins, text, or other markings on the page.

1. Draw two exits from each room.
 2. Write down your outside meeting place.
 3. Practice E.D.I.T.H.
- Exit Drills in the Home.
